

DEPARTMENT OF

COMPUTER SCIENCE & ENGINEERING

EXPERIMENT - 1

Student Name: Geetansh Garg

UID: 23BCS10285

Branch: BE-CSE

Section/Group: KRG_1-B

Semester: 5th

Date of Performance: 22/07/2025

Subject Name: ADBMS

Subject Code: 23CSP-333

1. AIM: Ques 1 :- Author-Book Relationship Using Joins and Basic SQL

Operations. **(EASY LEVEL)**

1. Design two tables — one for storing author details and the other for book details.
2. Ensure a foreign key relationship from the book to its respective author.
3. Insert at least three records in each table.
4. Perform an INNER JOIN to link each book with its author using the common author ID.
5. Select the book title, author name, and author's country.

2. TOOLS USED:- MS SSMS & Microsoft SQL Server

3. SQL CODE:

```
CREATE TABLE TBL_AUTHOR(  
AUTHOR_ID INT PRIMARY KEY,  
AUTHOR_NAME VARCHAR(30));
```

```
CREATE TABLE TBL_BOOK(  
BOOK_ID INT PRIMARY KEY,  
BOOK_TITLE VARCHAR(30),  
AUTHOR_ID INT,  
FOREIGN KEY (AUTHOR_ID) REFERENCES TBL_AUTHOR(AUTHOR_ID));
```

```
INSERT INTO TBL_AUTHOR (AUTHOR_ID, AUTHOR_NAME) VALUES  
(1, 'C.J. Date'),
```

DEPARTMENT OF

COMPUTER SCIENCE & ENGINEERING

```
(2, 'Silberschatz'),  
(3, 'A. Tanenbaum');
```

```
INSERT INTO TBL_BOOK (BOOK_ID, BOOK_TITLE, AUTHOR_ID) VALUES  
  
(101, 'Database Systems', 1),  
(102, 'Operating Systems', 2),  
(103, 'Computer Networks', 3),  
(104, 'Advanced Databases', 1),  
(105, 'Modern OS', 2);
```

```
SELECT * FROM TBL_BOOK;  
  
SELECT * FROM TBL_AUTHOR;
```

```
SELECT B.BOOK_TITLE , A.AUTHOR_NAME  
  
FROM TBL_BOOK AS B  
  
INNER JOIN  
  
TBL_AUTHOR AS A  
  
ON  
  
B.AUTHOR_ID = A.AUTHOR_ID;
```

4. OUTPUT:

	BOOK_TITLE	AUTHOR_NAME
1	Database Systems	C.J. Date
2	Operating Systems	Silberschatz
3	Computer Networks	A. Tanenbaum
4	Advanced Databases	C.J. Date
5	Modern OS	Silberschatz

5. Ques 2: -Department-Course Subquery and Access Control. (MEDIUM LEVEL)

1. Design normalized tables for departments and the courses they offer, maintaining a foreign key relationship.
2. Insert five departments and at least ten courses across those departments.
3. Use a subquery to count the number of courses under each department.
4. Filter and retrieve only those departments that offer more than two courses.
5. Grant SELECT-only access on the courses table to a specific user.

6. SQL CODE:-

```
-- Step 1: Create Tables
CREATE TABLE
Departments (
    department_id INT PRIMARY
    KEY,
    department_name VARCHAR(100) NOT
    NULL
);

CREATE TABLE Courses (
    course_id INT
    PRIMARY KEY,
    course_name
    VARCHAR(100) NOT NULL,
    department_id INT,
    FOREIGN KEY (department_id) REFERENCES Departments(department_id)
);
```

```
-- Step 2: Insert Data into Departments
INSERT INTO Departments (department_id, department_name) VALUES
(1, 'Computer Science'),
(2, 'Mechanical Engineering'),
(3, 'Electrical Engineering'),
(4, 'Civil Engineering'),
```

DEPARTMENT OF

COMPUTER SCIENCE & ENGINEERING

```
(5, 'Mathematics');
```

```
-- Step 3: Insert Data into Courses
```

```
INSERT INTO Courses (course_id, course_name, department_id) VALUES
```

```
(101, 'Data Structures', 1),
```

```
(102, 'Operating Systems', 1),
```

```
(103, 'Machine Learning', 1),
```

```
(104, 'Thermodynamics', 2),
```

```
(105, 'Fluid Mechanics', 2),
```

```
(106, 'Circuits and Systems', 3),
```

```
(107, 'Control Systems', 3),
```

```
(108, 'Structural Analysis', 4),
```

```
(109, 'Linear Algebra', 5),
```

```
(110, 'Calculus', 5),
```

```
(111, 'Probability Theory', 5);
```

```
-- Step 4: Count Number of Courses per Department
```

```
SELECT department_name, (SELECT COUNT(*)
```

```
FROM Courses c
```

```
WHERE c.department_id = d.department_id) AS course_count
```

```
FROM Departments d;
```

```
-- Step 5: Filter Departments Offering More Than 2 Courses
```

```
SELECT department_name, (SELECT COUNT(*)
```

```
FROM Courses c
```

```
WHERE c.department_id = d.department_id) AS course_count
```

```
FROM Departments d
```

```
WHERE (SELECT COUNT(*)
```

```
FROM Courses c
```

```
WHERE c.department_id = d.department_id) > 2;
```

7. OUTPUT

DEPARTMENT OF

COMPUTER SCIENCE & ENGINEERING

	department_name	course_count
1	Computer Science	3
2	Mathematics	3
